PROFESSIONAL SUMMARY

PHP Laravel Developer with 4.8+ years of experience building and maintaining web applications, REST APIs, CRM/marketplace platforms, booking systems, and payment-enabled applications. Strong hands-on experience with PHP, Laravel, MySQL/SQL, JavaScript, Angular, API integrations, MVC and Repository Pattern. Experienced in integrating third-party services including Stripe, Square, SendGrid, Plaid, Dwolla and PayNow. Focused on clean backend architecture, database-driven business logic, secure integrations and reliable delivery.

CORE TECHNICAL SKILLS

Backend: PHP, Laravel, MVC, REST APIs, Eloquent ORM, Repository Pattern, Authentication/Authorization

Frontend: HTML5, CSS3, JavaScript, jQuery, Bootstrap, Angular, TypeScript

Database: MySQL, SQL Server, MongoDB

Integrations: Stripe, Square, PayNow, SendGrid, Plaid, Dwolla, IPbase, FullCalendar

Tools: GitHub, Bitbucket, Postman, Jira, CPanel, SonarCloud, ESLint

PROFESSIONAL EXPERIENCE

PHP Laravel Developer | Infovenz Software Solutions | Trichy, Tamil Nadu | Jan 2025 – Present

- Develop and maintain Laravel-based CRM and marketplace applications supporting business workflows and customer-facing features.
- Develop backend modules and REST APIs using PHP, Laravel, SQL and JavaScript, with a focus on maintainable application architecture.
- Design and implement SQL Server stored procedure logic for complex business rules, data retrieval, reporting and transactional workflows.
- Work with stored procedures, joins, filtering, aggregations and database-level business logic to support application features and improve query-driven operations.
- Integrate payment and external service APIs, including Stripe and PayNow, while supporting secure transaction and business workflows.

PHP Laravel Developer | AIT (App Innovation Technologies) | Coimbatore, Tamil Nadu | Feb 2023 – Dec 2024

- Use MVC and Repository Pattern concepts to keep application logic organized, reusable and maintainable.
- Implemented third-party API and payment integrations for subscription, communication, identity and financial workflows.
- Worked with MySQL/MongoDB databases and backend business logic for application modules and user workflows.
- Used Postman, Git-based workflows and project tracking tools to support development, debugging and delivery.

Web Developer | Soft India | Trichy, Tamil Nadu | Dec 2021 – Jan 2023

- Developed and maintained web application features using PHP, JavaScript, HTML, CSS and Bootstrap.
- Worked with databases and backend logic while supporting application fixes, enhancements and client requirements.
- Built foundational experience in MVC-based web development, API usage and full-stack application workflows.

PROJECTS

PropNex – CRM Marketplace | Laravel, PHP, SQL, Stripe, PayNow

- Developed and maintained a CRM-based marketplace platform that enables agents to send gifts to clients efficiently.
- Implemented payment-related workflows using Stripe and PayNow APIs and supported secure transaction processing.
- Developed backend business logic and database workflows using Laravel, PHP and SQL.

Mandaiparks – Park Pass Booking System | PHP/Laravel, SQL Server, JavaScript, AJAX, Bootstrap

- Developed a park pass booking workflow for agents with business rules for yearly booking limits.
- Implemented rules allowing five parks per year and a maximum of two visits per park.
- Built pass generation functionality for approved bookings and improved the booking experience using AJAX.

Madison Ave – Capital Raising Platform | PHP, Laravel, MySQL, JavaScript, Bootstrap

- Worked on a web platform supporting capital-raising workflows and subscription management.
- Integrated Square subscription payments and third-party services including SendGrid, IPbase, Dwolla and Plaid.
- Developed frontend and backend features using HTML, CSS, JavaScript, Bootstrap, PHP and Laravel.

Spotz – Space Rental & Booking Platform | Angular, Node.js, MongoDB, Stripe, SendGrid, FullCalendar

- Contributed to a space rental and booking platform with multiple user roles and permission levels.
- Worked on booking workflows and third-party integrations including Stripe, SendGrid and FullCalendar.
- Developed frontend functionality using Angular and supported backend services using Node.js and MongoDB.

Quick Bill Pro | PHP, Laravel, Repository Pattern, MVC

- Built a billing/document-generation project using Laravel and Repository Pattern architecture.
- Implemented the project workflow rapidly while following MVC and reusable repository-based code organization.
- **GitHub:** github.com/00knaveen/QuickBill-Pro

TECHNICAL STRENGTHS

Database & SQL: Stored Procedures, SQL queries, joins, filtering, aggregations, relational data handling, transactional business logic.

Backend Architecture: Laravel MVC, Repository Pattern, REST APIs, business-rule implementation, third-party API integration.

Payments & Integrations: Stripe, PayNow, Square, SendGrid, Plaid, Dwolla and IPbase.

EDUCATION

B.E. Mechanical Engineering | Indra Ganesan College of Engineering | 2016 – 2020 | CGPA: 6.8

CERTIFICATION

Web Design Certification | 2022 – 2023

LANGUAGES

Tamil – Native | English – Full Professional Proficiency
